

Unleashing Data for Strategic Insights

Position: Business Analyst

Analytical Toolkit: Microsoft Excel, SQL

About ProcDNA

ProcDNA is a consulting and technology firm that helps organizations solve complex business challenges through data-driven decisions, advanced technologies, and actionable insights. Founded in 2020, ProcDNA has grown into a bootstrapped and profitable organization with 425+ team members across 8 global locations. At ProcDNA, innovation, learning, and collaboration are at the core of how we work.

What we are looking for

We are looking for a **Business Analyst** who can turn data into meaningful insights and business impact. This role is ideal for candidates who enjoy structured problem-solving, are comfortable working with data, and can translate analysis into real business decisions. You should be excited to work in a fast-paced consulting environment and contribute to projects in healthcare and pharmaceutical space.

What you'll do

- Analyze complex datasets using Excel, SQL, Python and other analytical and reporting tools to generate insights that support strategic decision-making
- Work with clients and internal teams to understand business problems, translate them into analytical approaches, and deliver relevant recommendations within the healthcare/pharma sector
- Contribute to the development and enhancement of analytical models, dashboards, and business intelligence solutions to support commercial analytics use cases
- Support engagements across US healthcare commercial activities such as segmentation, call planning, incentive compensation, marketing analytics, and other business reporting and analysis needs
- Identify opportunities to improve reporting processes, analysis quality, and delivery efficiency, while communicating insights clearly to internal stakeholders and client teams

Must have

- Bachelor's degree in engineering with a record of academic excellence
- Strong analytical and problem-solving skills
- Excellent verbal and written communication skills, essential for effective collaboration
- Ability to manage multiple projects simultaneously, ensuring quality outcomes
- Good working knowledge of Microsoft Excel and SQL

Good to have

- Internship or project experience in analytics, consulting, business analysis, or healthcare/pharma
- Exposure to tools like Tableau, Alteryx, or Power BI
- Familiarity with commercial analytics use cases such as segmentation, call plan design, incentive compensation, marketing mix, or sales analytics
